What Is Contemporary Art? ×

Today's goals
Complete any 3 learning items · 3/3
Complete 3 readings · 3/3
Watch a video

Module 1
Introduction to What Is Contemporary Art?

Module 2
Media from Television to the Internet

Module 3
Territories & Transit

Borders & Transit
✓ Introduction to Module 3
Reading • 10 min
✓ In the studio with Rael San Fratello | Transforming the wall
Video • 5 min
✓ Bouchra Khalili on The Mapping Journey Project, 2008–11
Video • 3 min
✓ Crossing borders
Reading • 10 min
✓ Mateo López on Travel without Movement, 2008–10
Video • 2 min

Place
✓ Claiming space
Reading • 10 min
✓ Shellyne Rodriguez on Martin Wong, Stanton near Forsyth Street, 1983
Video • 1 min
✓ Changing states
Reading • 10 min
✓ IRWIN on NSK Garda, 2002
Video • 1 min
✓ Sky Hopinka on Jáaji Approx., 2015
Reading • 10 min
✓ Amanda Williams on Color(ed) Theory Suite, 2014–16
Video • 2 min
✓ Portfolio: Teresa Margolles, Pista de baile (Dance Floor), 2016
Reading • 10 min

Review & Respond
✓ Memory Check
Practice Assignment • Grade: 90%
✓ Reflect on Territories & Transit
Dialogue • 15 min
✓ Mid-course survey
Reading • 5 min
✓ Optional Readings & Resources
Reading • 10 min

Module 4
Materials & Making

What Is It Made Of?
✓ Introduction to Module 4
Reading • 10 min
✓ At the Museum with Sheila Hicks | Form, Texture, Color
Video • 4 min
✓ Liz Deschenes on Tilt/Swing (360° field of vision, version 1), 2009
Video • 1 min
✓ Film, vinyl, and ultrasonic gel
Reading • 10 min
✓ Sheela Gowda on Of All People, 2011
Video • 3 min
✓ 3-D printed architecture with Rael San Fratello
Video • 4 min

How Is It Made?
✓ How is contemporary art made?
Reading • 10 min
✓ Lady Pink on Trust visions that don't feature buckets of blood, 1983–84
Video • 2 min
✓ Glenn Ligon on White #19, 1994
Video • 1 min
✓ Amy Sillman on making and unmaking painting
Video • 1 min
○ **Building, painting, printing**
Reading • 10 min
○ Luther Price, Sorry, 2005–12
Reading • 10 min

Who Makes It?
○ Labor and work in contemporary art
Reading • 10 min
○ Interview with Revital Cohen & Tuur Van Balen on 75 Watt, 2013
Reading • 10 min
○ Anne Teresa De Keersmaeker, Work/Travail/Arbeid, 2017
Reading • 10 min

Review & Respond
○ Memory Check
Practice Assignment
○ Reflect on Module 4 Insights
Dialogue • 15 min
○ Optional Readings & Resources
Reading • 10 min

Module 5
Agency

Module 6
Power

Building, painting, printing

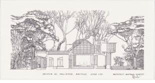
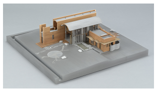
Anupama Kundoo, Wall House, Auroville, India, 1997–2000



Anupama Kundoo. *Wall House, Auroville, India (Plan)*. 1997–2000. Ink on paper, 24 7/16 × 24 7/16" (62 × 62 cm). The Museum of Modern Art, New York. Fund for the Twenty-First Century. © 2019 Anupama Kundoo Architects

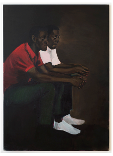
Architect Anupama Kundoo designed Wall House for herself and her family on the outskirts of an experimental utopian community in southeast India. Finding current building practices environmentally and socioeconomically unsustainable, she made her home a testing ground and model for her conviction that "architecture must be appropriate to the context."

In practice, this means that Kundoo used materials specific to her surroundings (like ferro-cement and terracotta) and employed local workers alongside skilled craftspeople and what she describes as "knowledge-based scientific systems" to construct her home. Its southeast orientation and efficient insulation help maintain a comfortable temperature and are components of an eco-friendly design, which is entirely solar-powered. Windows puncture every surface of Wall House, which has at its center a grand vaulted space. This porous plan makes nature an integral part of the house and the lives of its residents.



Anupama Kundoo. *Wall House, Auroville, India (Scale model)*. 1997–2000. Model, 9 13/16 × 23 5/8 × 23 5/8" (25 × 60 × 60 cm). The Museum of Modern Art, New York. Fund for the Twenty-First Century. © 2019 Anupama Kundoo Architects

Lynette Yiadom-Boakye, *The Myriad Motives of Men*, 2014

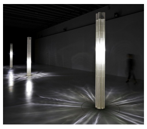


Lynette Yiadom-Boakye. *The Myriad Motives of Men*. 2014. Oil on canvas, 71 × 51 1/4" (180.3 × 130.2 cm). The Museum of Modern Art, New York. Gift of Dian Woodner in honor of The Friends of Education of The Museum of Modern Art. © Lynette Yiadom-Boakye. Courtesy of the artist, Jack Shainman Gallery, New York and Corvi-Mora, London

Lynette Yiadom-Boakye paints fast, usually completing her canvases in one day. She has said that she approaches her work thinking of "a color, a composition, a gesture, a particular direction of the light." Though she focuses on human figures, she is not a portraitist. The people in her paintings, like the two men sitting in *The Myriad Motives of Men*, are, in her words, "a composite." She generates them out of her memories and observations, taking inspiration from the history of painting, working out her ideas in scrapbooks, drawings, and, ultimately, on the canvas itself.

Yiadom-Boakye uses a kaleidoscope of browns, mixing this color with others to paint figures with skin that is, for example, brown-yellow, brown-pink, or brown-blue-green. She offers little clue as to who or where these figures are, preferring to keep her compositions open to whatever stories viewers may bring to them.

Neri Oxman, Glass II, 2017



Neri Oxman, The Mediated Matter Group, Massachusetts Institute of Technology, Cambridge, MA. Glass II. 2017. 3-D-printed glass, 118 1/8 × 11 13/16" (300 × 30 cm). The Museum of Modern Art, New York. The Modern Women's Fund. © 2019 Neri Oxman

Together with the multidisciplinary team she founded at MIT (the Mediated Matter Group), Neri Oxman custom built a 3D printer that could withstand enormous heat and be programmed to print glass. The group's second-generation printer extrudes toothpaste-like coils of molten glass to make components that can be stacked into architectural columns, including those in Glass II.

Inspired by natural forms, the shape of the columns is ultimately determined by their proposed structural load: the greater the load the more intricate the pattern. Oxman explained that she and her team engineered the columns "to potentially harness and harvest solar energy on demand." Beauty is also integral to their design. They reflect and refract light, emanating continually shifting patterns across floors, walls, and ceilings.
