Anxiety and Related Disorders ✕

Today's goal • 3/3 items

Module 1
Learn With PsycLearn Essentials

Module 2
Introduction to Psychological Disorders

Module 3
Opening to Anxiety Disorders

Module 4
Components of Anxiety

Module 5
Disorders that Involve Anxiety Part 1

Generalized Anxiety Disorders
- ✓ Diagnostic Criteria, Prevalence, Contributing Factors, and Cultural Issues for Generalized Anxiety Disorder
  Reading • 10 min
- ✓ Check Your Understanding: Generalized Anxiety Disorder
  Practice Assignment • Grade: 100%

Panic Disorder
- ✓ Diagnostic Criteria, Prevalence, Contributing Factors, and Cultural Issues for Panic Disorder
  Reading • 10 min
- ✓ Check Your Understanding: Panic Disorder
  Practice Assignment • Grade: 80%

Specific Phobias
- ✓ Diagnostic Criteria and Prevalence for Specific Phobias
  Reading • 15 min
- ✓ Contributing Factors for Specific Phobias
  Reading • 10 min
- ✓ Classical Conditioning of Specific Phobias
  Video • 2 min
- ✓ Operant Conditioning and Negative Reinforcement of Specific Phobias
  Video • 3 min
- ○ **Cultural Issues for Specific Phobias**
  Reading • 2 min
- ○ Check Your Understanding: Specific Phobias
  Practice Assignment • 6 min

Key Takeaways
- ○ Key Takeaways: Disorders that Involve Anxiety Part 1
  Reading • 10 min

Module 5 Quiz
- ○ Module Quiz: Disorders that Involve Anxiety Part 1
  Graded Assignment • 10 min

Module 6
Disorders that Involve Anxiety Part 2

Module 7
Conclusion

Module 8
Cumulative Quiz

Module 9
Course Resources

Module 10

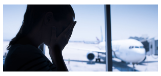
Cultural Issues for Specific Phobias

0:38 / 0:46 1x



Cultural Issues

As with other disorders, the diagnosis of specific phobia is influenced by cultural issues. A diagnosis of phobia should not be made in areas where specific objects or situations are feared by most people unless that fear is extreme and impairs daily functioning (WHO, 2019). The prevalence of certain phobias varies across countries based, in part, on the extent to which individuals in a culture have experience with a potentially phobic object or situation. The fear of flying, for example, is three times higher in higher income than lower income countries, owing to the fact that individuals in higher income countries are more likely to have the ability to travel by air (Wardenaar et al., 2017).
