14. How do intertemporal trade-offs change with age? If a 16-year-old is offered a choice between a small reward today and a larger reward in 10 years, the discount rate is higher than for a 40-year-old. Why? (See <http://www.ck12.org/intermediate/intermediate%20math/Chapter%2014/intermediate%20math%20chapter%2014%20lesson%2014.10%20-%20intertemporal%20trade-offs%20-%20ck12.org>)
