Fundamentals of Azure Databricks

Today's goal • 1/3 items

You're halfway done with today's goal! Keep it up!

Module 1
Before you start

Module 2
Introduction

Module 3
Getting Started

Module 4
Working in Databricks Workspace

Module 5
Working with Databricks File System - DBFS

- ✓ What will you learn in this section
  Video • 1 min
- ✓ Introduction to DBFS
  Video • 3 min
- ✓ Working with DBFS Root
  Video • 9 min
- ✓ Mounting ADLS to DBFS
  Video • 41 min
- ○ **Conclusion to the Course 'Fundamentals of Azure Databricks'**
  Reading • 10 min
- ○ Exploring the Databricks File System (DBFS) and Azure Storage Mounting
  Dialogue • 15 min
- ○ Working with Databricks File System - DBFS - Assessment
  Graded Assignment • 15 min
- ○ Full Course Practice Assessment
  Practice Assignment • 15 min
- ○ Full Course Assessment
  Graded Assignment • 1h

Conclusion to the Course 'Fundamentals of Azure Databricks'

0:04 / 1:38 1x

Congratulations on completing the **Fundamentals of Azure Databricks course!** Let's take a moment to recap the significant milestones you've achieved:

In this course, you explored the core concepts and functionalities of Azure Databricks, focusing on big data and machine learning tasks. You learned to set up your Azure Cloud account, create Databricks workspaces, and navigate the Azure portal. You gained hands-on experience configuring Spark clusters and using Databricks notebooks. Key features such as magic commands and Databricks Utilities were covered to enhance data processing. By the end, you acquired practical skills in Azure Databricks for data engineering tasks.

As you continue to build on these skills, we recommend enrolling in the following courses that are part of our specialization title, Mastering Azure Databricks for Data Engineers to further enhance your capabilities:

- **Advanced Data Management in Azure Databricks:** Advance your data management skills with this comprehensive course on Azure Databricks. Learn about Unity Catalog, Delta Tables, and Databricks ingestion tools for managing large-scale data. Perfect for data professionals looking to enhance their cloud data management capabilities.
- **Automation and Project Implementation in Azure Databricks:** This course will guide you through the process of automating and implementing projects in Azure Databricks. You'll learn to manage workflows, repositories, and data layers while applying your skills in a hands-on capstone project.

Thank you for being a part of this course. Keep up the great work, and happy learning!
