  Video • 4 min
- ○ **Exercise**
  Reading • 30 min

Sleep
- ○ Sleep Deprivation & Appetite
  Video • 2 min
- ○ Sleep
  Reading • 30 min

Food for Thought
- ○ Let's Practice!
  Practice Assignment • 30 min
- ○ Managing Stress, Exercise, & Sleep
  Peer-graded Assignment • 30 min
- ○ Managing Stress, Exercise, & Sleep
  Review Your Peers

Module 4
Using Habit & Emotions to Your Advantage

Module 5
Creating a Weight Loss Plan: A Step-Wise Approach

Exercise

0:07 / 1:29 1x

Here are a few helpful resources based on information from the previous lecture.

- **Does Exercise Help You Lose Weight?**
- **How Exercise Helps Balance Hormones**
- **10 Sneaky Ways to Incorporate More Exercise into Your Day**

Easy Ways to Add More Physical Activity Into Your Daily Routine

When at work:

- Stand up to take phone calls.
- Go for a walk at lunch.
- Take the stairs.
- Walk to the break room, water cooler, or restroom every 90 minutes. (Set an alarm on your phone so you don't forget.)
- Stretch/exercise at your desk.
- Have a question for a coworker? Walk to their desk instead of sending an email.

When at home:

- Play fitness-oriented video games, like Wii Fit or Dance Dance Revolution.
- Dance around your house just for fun.
- Clean. (It counts as exercise.)
- Play with or walk your pets.
- Do a few sets of exercises (squats, lunges, push-ups, burpees, etc.) any time you have 5 minutes to spare, during commercial breaks while watching TV or in between episodes if you're watching Netflix.

When out:

- Walk or ride your bike to your destination whenever possible.
- Park your car far away from an entrance when running errands.
- If you use public transportation, ride standing up. And if you have the time, get off one or two stops early and walk the extra distance.
- At the mall or department store, take the stairs and skip escalators and elevators.
- Schedule active weekend events like bike rides, park dates, or easy day-hikes.
